Tax Tools for Schedule C Filers

Background & Disclosures

This package includes tax guides to empower providers to take advantage of efficient, cost-effective online methods of tax preparation and complete their own tax submissions. Additionally, an online app runs through key business questions and provides a printout of information so that family child care providers that use a tax preparer can ensure the tax preparer has all the correct info they need so that the filing is done correctly. Lastly, an additional app focused on the Employee Retention Tax Credit runs through a series of questions to help child care providers assess whether they are eligible for the tax credit and how to go about applying for it.

Language included in the documents references Wisconsin-based organizations that created the content, but the information is relevant to childcare providers delivering services and filing taxes in Montana.

Wisconsin Early Education Shared Services (WEESN), a program of Wisconsin Early Childhood Association (WECA), partnered with Civitas Strategies to create a revolutionary new set of tax resources specifically for child care businesses. These tools are free to child care providers across the nation because we know there are thousands of child care providers who can benefit immediately.

These guides are for Schedule C (sole proprietors and owners of LLCs) tax filers only.

TAX FILING ACCURACY APP

This app gives child care providers the specific knowledge they need to provide accurate information about their business and understand where to enter data on their tax forms.
